ECONOMIC COMMISSION FOR AFRICA

Regional Symposium on the Training of Personnel  
(at all levels) for Power Production and  
Distribution

Addis Ababa, 10 - 20 December 1973

ADVISORY SERVICES IN THE FIELD OF ELECTRICITY - UNITED KINGDOM

In addition to the information on training facilities given in the document presented by the Overseas Development Administration (E/CN.14/EP/INF/08), members of the Symposium may find it helpful to be aware of the facilities offered by the following organizations:-

- 1. The Council for Technical Education and Training in Overseas Countries (TETCC), which can offer advice on:-

- Planning industrial training nationally or by industry
- Analysing training needs and domestic resources
- Coordinating general education, training and retaining
- Developing training schemes for technical, operative and clinical staff
- Training instructors
- Trade testing and phase testing for standard setting in industry
- Selecting training staff
- Identifying UK sources of training and training material.

- 2. The Overseas Consultancy Service of the Electricity Council, through which the "know-how" of the electricity supply industry in the U.K. on technical, commercial, administrative and training matters can be made available to overseas organisations on a consultancy basis.

Further information and booklets about these organisations can be obtained from the U.K. delegate Mr. J.E. Holden

Also available for examination are examples of the 34 Training Recommendations issued by the Electricity Supply Industry Training Board, which cover most major sectors of training for the industry.
