ECONOMIC COMMISSION FOR AFRICA

Meetings of the Executive Board and of the Council of the African Regional Centre for Engineering Design and Manufacturing

Addis Ababa, Ethiopia, 6, 7 and 8 August 1980

REVISED WORK PROGRAMME OF THE CENTRE

1980-1982

A STATE OF THE STATE OF THE STATE OF

- 1. There has been some slippage of time in implementing the Work Programme of the Centre for 1980-1981 which was placed before the Executive Board in October 1979.
- 2. On the one side, there has been some delay due to the time it has taken to reach for a suitably qualified and experienced engineer to fill the post of Executive Director of the Centre. One has now been selected and it is expected that he will be able to assume duty by October this year. An Assistant Director in charge of administration has also been chosen and should take up his functions at about the same time.
- 3. With these two posts filled, it is now realistic to expect that the programme for establishing the Centre in temporary buildings in Ibadan commence in October 1980. It is envisaged that the Executive Director will make a number of visits to some of the member States of the Centre before the end of the year.
- 4. The programme of organization development to be undertaken by the Executive Director in the first year remains substantially the same as originally approved, but is now shifted by one year to 1981.
- 5. The physical development of the site which is the responsibility of the host Government has also experienced some delay. Although funds have been carmarked for the purpose, the constitutional changes in Nigeria have caused some delay with setting up an implementation body. As reported already, a Programme Implementation Committee has now been set up by the host Government under the chairmanship of the Federal Minister of Industries, with representation from the EGA and the Centre.
- 6. With these arrangements concluded, the way is now clear for action to be taken on the implementation of the programme for the physical development of the Centre which should now take off from 1981.
