**ROSTER
OF AFRICAN WOMEN EXPERTS**

**UNITED NATIONS
ECONOMIC COMMISSION FOR AFRICA
AFRICAN TRAINING AND RESEARCH CENTER FOR WOMEN
1991**

INTRODUCTION

This volume is the second edition of the Roster of African Women Experts. In comparison with the first issue this one has a wider geographical and subject scope as well as a bigger number of experts (508).

We included into the second edition of the Roster only those candidates who met our criteria which were as follows:

- Nationality (i.e. any African state);
- Educational qualifications (at least the first degree);
- Work experience (at least five years for those with the first degree and at least three years for those with the second degree) in the field of expertise

As the reader will notice, the data on some of the experts is not complete (for example, the **contact address** is missing) and not updated because of lack of response from the candidates. In spite of such a drawback, we, nevertheless, decided to include such experts into this publication. To us the primary purpose of such publications as the present Roster is to advertise the great intellectual potential of African women in various spheres of knowledge. Taking into account that our edition is going to be widely distributed around the world, we regard it as a wonderful means of popularisation of African women as possible and potential experts, consultants, advisors, contractors and employees. That is why we think that such publications are to a mutual benefit for those who are in need of qualified and experienced staff and for those who would like to find an application for her skills and knowledge. We hope that the women whose data is incomplete or not updated will contact us as soon as they learn about the Roster in order to restore this information gap.

The candidates who are not included into this edition but who might have applied to the ATRCW should not be worried. Their data will be kept in the Center's files until the next occurrence when we shall contact them for updating their personnel information.

For those who might want to apply for inclusion into our subsequent editions, we have provided in this publication with a copy of the ATRCW Roster Data Collection Form.

We have also provided in this edition the Name Index, Country Index and Subject Index in order to make use of the information herein contained easier. The data is listed according to the master file numbers which are arranged in ascending order and which may also be found in the attached indexes and thus serve as a reference number.
